

NICHOLAS RUFFIN

Staff Data Engineer | Enterprise Data Platforms

Ellisville, MO (843) 793-9770 nruffinsecure@gmail.com linkedin.com/in/nicholas-ruffin

PROFESSIONAL SUMMARY

Data platform engineer with 12+ years of experience designing scalable data architectures, building production ETL/ELT pipelines, and driving enterprise data strategy across cross-functional teams. Currently architecting a data monetization platform generating \$7M+ ARR, processing 4.8B de-identified records through Snowflake and AWS. Deep expertise in Python, SQL, AWS, and Airflow with a proven ability to own end-to-end data warehouse design, implement data governance practices, and influence technical direction across Engineering, Product, and Analytics. Brings director-level experience managing 16+ engineers, providing unique cross-team leadership perspective at the Staff level.

TECHNICAL SKILLS

Data Engineering	Python, SQL, ETL/ELT Pipeline Design, Dimensional Modeling, Data Warehousing, Data Governance, RBAC
Data Platforms	Snowflake (Procs, Streams, Tasks), AWS (MWAA, S3, Lambda, IAM, Redshift-familiar), Kafka, AWS Glue
DevOps	Apache Airflow, Terraform, GitHub Actions (CI/CD), Docker, Git
Leadership	Cross-team technical influence, enterprise data modeling, vendor evaluation, TCO analysis, mentoring

EXPERIENCE

Senior Clinical Data Engineer | RedSail Technologies

Feb 2025 - Present

- Architected enterprise data monetization platform generating **\$7M+ ARR** by designing secure PII tokenization workflows (Snowflake + Datavant), enabling pharmaceutical clients to access privacy-compliant clinical datasets.
- Engineered de-identification pipelines processing **4.8 billion records** daily (3M+ transactions/hour), designing scalable data warehouse schemas with dimensional modeling strategies.
- Built Python/Airflow orchestration framework deployed via GitHub Actions, automating **50+ daily workflows** for S3 extraction and ETL processing.
- Implemented data governance practices including role-based access control, HIPAA-compliant data handling, and automated data quality validation across the platform.
- Optimized Snowflake architecture reducing query latency by **40%** and eliminating critical manual bottlenecks, achieving **99.5% pipeline uptime** SLA.

Director of Full Stack Development | Nimble Solutions

Aug 2021 - Jan 2025

Promoted from Lead Software Engineer to Director by the CIO. Built and managed an engineering department of 16+ people across three functional teams: 5 US software engineers, 6 SQL/data developers, 5 offshore RPA developers in Hyderabad, and a project manager.

- Led technology due diligence for **4 acquisitions** — a coding company, 2 transcription businesses (Hyderabad and California), and an anesthesia company. Traveled to Hyderabad to integrate the acquired development team into US operations.
- Designed and led the build of **QUARC**, a queue-based AR claims reimbursement system ordered by revenue with historical AR aging data, increasing throughput to **30+ claims/day per rep**.
- Partnered with CIO, VP of Infrastructure, and CISO on **technical strategy, vendor evaluations, and TCO analysis**. Traveled with C-suite for due diligence and integration planning.
- Engineered integration of **50+ data sources** into a unified enterprise data model, designing API orchestration patterns for high reliability.
- Established technical standards, implemented CI/CD pipelines reducing deployment time by **60%**, and achieved **90%+ test code coverage**.
- Mentored engineers across all three teams, building a culture of code quality, test-driven development, and cross-functional collaboration.

Senior Full Stack Developer | Core & Main

Jun 2017 - Aug 2021

- Developed enterprise data applications using C#/.NET and SQL, supporting **200+ concurrent** corporate users.

EDUCATION

Bachelor of Science, Information Technology

University of Phoenix
