

# NICHOLAS RUFFIN

Analytics Engineering Leader | Healthcare Data & AI Readiness

Ellisville, MO | (843) 793-9770 | [nruffinsecure@gmail.com](mailto:nruffinsecure@gmail.com) | [linkedin.com/in/nicholas-ruffin](https://www.linkedin.com/in/nicholas-ruffin)

## PROFESSIONAL SUMMARY

Hands-on analytics engineering leader with 12+ years of experience building data platforms in healthcare, specializing in claims data pipelines, HIPAA-compliant architectures, and AI/ML-ready data infrastructure. Currently leading a data product engineering team that processes 4.8B de-identified pharmacy claims records through Python and SQL pipelines, delivering analytics-ready datasets to pharmaceutical buyers. Proven ability to lead teams (16+ engineers across US/India), partner cross-functionally with product and analytics stakeholders, and translate complex healthcare data into actionable intelligence while maintaining strict regulatory compliance.

## TECHNICAL SKILLS

|                |                                                                                                                                           |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Engineering    | Python, SQL, ETL/ELT Pipeline Design, Data Warehousing, Analytics Engineering, HIPAA Compliance, Datavant Tokenization, De-identification |
| Data Platforms | Snowflake (Procs, Streams, Tasks, Multi-instance), AWS (MWAA, S3, Lambda, Fargate, IAM), Kafka                                            |
| Leadership     | Team building (16+ across US/India), cross-functional partnership, client management, vendor evaluation, technical strategy, mentoring    |
| DevOps         | Apache Airflow, Terraform, GitHub Actions (CI/CD), Docker, Git                                                                            |

## EXPERIENCE

### Manager, Data Product Engineering | RedSail Technologies

Feb 2025 – Present

*Promoted from Senior Clinical Data Engineer. Leading the data monetization analytics engineering team.*

- Own end-to-end healthcare data platform generating **\$7M+ ARR**, architecting HIPAA-compliant de-identification and tokenization pipelines (Snowflake + Python + Datavant) processing **4.8 billion pharmacy claims records** for analytical consumption.
- Architected next-generation V2 tokenization pipeline (AWS Fargate + Snowflake), designing analytics-ready data models and automated orchestration spanning **50+ daily workflows** with Python-driven pipeline logic.
- Oversee regulatory compliance including HIPAA audit readiness, proof-of-delivery documentation, and Expert Determination coordination with third-party statistical evaluators.
- Lead cross-functional collaboration with product management, infrastructure engineering, and external partners to drive platform roadmap and delivery timelines for healthcare claims data products.
- Manage client delivery relationships across **5+ pharmaceutical data buyers**, owning delivery SLAs, schema specifications, and ongoing analytical partnership.
- Building and onboarding analytics engineering team, establishing technical standards, code review processes, and deployment workflows via Terraform and GitHub Actions.

### Director of Full Stack Development | Nimble Solutions

Aug 2021 – Jan 2025

*Promoted from Lead Software Engineer to Director by the CIO. Built and managed an engineering department of 16+ people across three functional teams: 5 US software engineers, 6 SQL/data developers, 5 offshore developers in Hyderabad, and a project manager.*

- Designed and led the build of **QUARC**, a data-driven claims reimbursement system leveraging historical AR aging analytics to prioritize revenue recovery, increasing throughput to **30+ claims/day per rep**.
- Led technology due diligence for **4 acquisitions** including healthcare coding, transcription, and anesthesia companies. Traveled internationally to integrate acquired teams.
- Engineered integration of **50+ healthcare data sources** into a unified enterprise workflow, designing Python and SQL orchestration patterns for high reliability.
- Partnered with CIO, VP of Infrastructure, and CISO on **technical strategy, vendor evaluations, and TCO analysis** for healthcare data systems.
- Established technical standards, implemented CI/CD pipelines reducing deployment time by **60%**, and achieved **90%+ test code coverage**.
- Mentored engineers across all three teams, building a culture of code quality, test-driven development, and cross-functional collaboration.

### Senior Full Stack Developer | Core & Main

Jun 2017 – Aug 2021

- Developed enterprise data applications using C#/.NET and SQL, supporting **200+ concurrent** corporate users across operations.

## EDUCATION

---

Bachelor of Science, Information Technology

University of Phoenix
