

NICHOLAS RUFFIN

Infrastructure & Platform Engineering Leader | Healthcare Data at Scale

Ellisville, MO | (843) 793-9770 | nruffinsecure@gmail.com | [linkedin.com/in/nicholas-ruffin](https://www.linkedin.com/in/nicholas-ruffin)

PROFESSIONAL SUMMARY

Infrastructure-focused engineering leader with 12+ years of experience building and operating highly available data platforms in regulated healthcare environments. Currently architecting and operating the AWS infrastructure behind a \$7M+ ARR data monetization platform that delivers billions of records to healthcare data buyers — including Komodo Health — with strict SLA compliance and security controls. Deep expertise in AWS (Fargate, S3, Lambda, IAM), Terraform-managed IaC, Snowflake at scale, and Airflow orchestration. Proven track record leading teams of 16+ engineers, managing infrastructure reliability across production workloads, and maintaining HIPAA compliance in multi-tenant environments.

TECHNICAL SKILLS

Infrastructure	AWS (S3, Lambda, Fargate, IAM, MWAA), Terraform (IaC), Docker, GitHub Actions (CI/CD), Security & Access Controls
Data Platforms	Snowflake (Multi-instance, Procs, Streams, Tasks), Apache Airflow, Kafka, Data Warehousing
Security	HIPAA Compliance, De-identification/Tokenization (Datavant), IAM Policy Design, Audit Readiness, PHI/PII Protection
Leadership	Team building (16+ across US/India), cross-functional partnership, vendor evaluation, technical strategy, SLA management

EXPERIENCE

Manager, Data Product Engineering | RedSail Technologies

Feb 2025 – Present

Promoted from Senior Clinical Data Engineer. Leading platform infrastructure and data engineering for the data monetization product.

- Architected next-generation V2 tokenization infrastructure (AWS Fargate + Snowflake), designing secure containerized workloads with Terraform-managed IaC and automated orchestration spanning **50+ daily production workflows**.
- Own end-to-end platform reliability for a **\$7M+ ARR** data monetization system processing **4.8 billion records**, ensuring uptime, data integrity, and delivery SLA compliance across all production pipelines.
- Manage secure data delivery infrastructure for **5+ healthcare data buyers including Komodo Health**, operating S3-based delivery channels with IAM access controls, encryption, and audit trails.
- Oversee security and compliance posture including HIPAA audit readiness, proof-of-delivery documentation, and Expert Determination coordination with third-party evaluators.
- Lead cross-functional collaboration with infrastructure engineering, product management, and external vendor partners to drive platform reliability and scalability roadmap.
- Building and onboarding engineering team, establishing infrastructure-as-code standards, code review processes, and deployment automation via Terraform and GitHub Actions.

Director of Full Stack Development | Nimble Solutions

Aug 2021 – Jan 2025

Promoted from Lead Software Engineer to Director by the CIO. Built and managed an engineering department of 16+ people across three functional teams: 5 US software engineers, 6 SQL/data developers, 5 offshore developers in Hyderabad, and a project manager.

- Partnered with CIO, VP of Infrastructure, and CISO on **technical strategy, vendor evaluations, and TCO analysis**, contributing to infrastructure reliability and security decisions.
- Established CI/CD pipelines and infrastructure automation reducing deployment time by **60%**, achieving **90%+ test code coverage** and high system reliability.
- Led technology due diligence for **4 acquisitions** — evaluating infrastructure, security posture, and integration complexity. Traveled internationally to integrate acquired engineering teams.
- Engineered integration of **50+ data sources** into a unified enterprise platform, designing API orchestration patterns for high availability and reliability.
- Designed and led the build of **QUARC**, a queue-based claims reimbursement system, increasing throughput to **30+ claims/day per rep** with high-availability architecture.
- Mentored engineers across all three teams, building a culture of operational excellence, infrastructure reliability, and security-first development.

Senior Full Stack Developer | Core & Main

Jun 2017 – Aug 2021

- Developed enterprise data applications using C#/.NET and SQL, supporting **200+ concurrent** corporate users with high-availability requirements.

EDUCATION

Bachelor of Science, Information Technology

University of Phoenix
